15 Oct 69

MEMORANDUM FOR: ALL TSSG Divisions

SUBJECT : Scientific Support for Optical Engineering Problems

1. [redacted] is under contract to RED to provide expert consultation on optical engineering problems. [redacted] are the principal investigators; their services are available to any TSSG element.

2. Appropriate tasking includes evaluation of lens designs, identification of key optical system parameters, final report critiques, recommendations on optical instruments and fabrication methods, questions on coherence specification and measurement techniques, problems involving optical data processing, evaluating proposed applications of theoretical concepts, and related subjects.

3. Requests for these services should be made only after it has been determined that the problem cannot be resolved inhouse since the funds available are obviously limited. All questions and requests for support should be directed to C/RED, attention [redacted] CH/ITS/ATB, [redacted]
